Interviewer Name:

Date(s) Interviewed (e.g.10/1/2008)

Place(s) Interviewed (eg. Grocery store)

Town/Zip code

Assign a number to each person interviewed and put a check mark in boxes for each response.

## **Interviewee Responses**

Greetings, do you have five minutes to complete a survey on environmental issues? Great, let's begin.

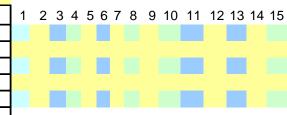

1. You may have heard about the idea that the world's temperatures have been rising over the past 100 years causing concerns about rising temperatures and climate change (or global warming) around the world.

How concerned are you about these issues - are you very concerned, somewhat concerned, not too concerned, or not at all concerned?

Note to interviewer: do not read "don't know or refused", use this reponse category only if required. This

pertains to all questions below.

	Count	Percent	1
Very Concerned		#DIV/0!	
Somewhat Concerned		#DIV/0!	
Not Very Concerned		#DIV/0!	
Not at all Concerned		#DIV/0!	
Don't Know/Refuse		#DIV/0!	
Total		#DIV/0!	

2. Do you think the rise in the world's temperatures is being caused mostly by things people do, mostly by natural causes, or about equally by things people do and by natural causes?

	Count	Percent	1	2	3 4	- 5	6	7	8	9	10	11	12	13	14	15
Things people do		#DIV/0!														
Natural Causes		#DIV/0!														
Both people and natural		#DIV/0!														
Don't Know/Refuse		#DIV/0!														
Total		#DIV/0!														

3. How likely are you to make changes in the way you live to reduce your contribution to the effects of climate change?

Would you say that you are - very likely, somewhat likely, somewhat unlikely or very unlikely to make changes?

	Count	Percent	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Very Likely		#VALUE!															
Somewhat likely		#VALUE!															
Somewhat likely		#VALUE!															
Very Unlikely		#VALUE!															
Total		#VALUE!															

4. Have you heard of the term "carbon footprint? Y/N Explain if no...

"A carbon footprint is a way of estimating the carbon dioxide emissions each of us contributes to the atmosphere. Emissions of carbon dioxide contrivute to the rise in the world's temperature. Our carbon emissions result from the amount of energy we are personally using in our lives to heat and power our homes, drive our cars, how much we consume and dispose of as waste products."

	Count	Percent	1	2	3 4	1 5	5 6	6 7	8	9	10	11	12	13	14 1	5
Yes		#VALUE!														
No		#VALUE!														
Don't Know		#VALUE!														
Refuse		#VALUE!														
Total		#VALUE!

## INTERVIEWER INSTRUCTIONS:

After you record individual responses, please tally them up in the Count boxes.

Then enter the data into the Excel spreadsheet provided and send in to:

debbie.j.avalone-king@maine.gov.

Also mail in your handwritten sheets to Deb at Maine DEP, SHS 17, Augusta, ME 04333

Thank you. We have a free magnet as a thank you gift for participating in our survey. Would you like one?
